HIT ANY KEY TO CONTINUE

FROM THE PRESIDENT...

Leslie Bradford

"The first meetings are always the hardest to get through...". It has been a very long time since I've been in front of a crowd and ran a meeting. I had forgot how many butterflies can cruise through your tummy. I want to thank everyone for the input that came from the last meeting. I appreciate the feedback and many of the suggestions will be implemented. I do want you to know that the January meeting was not a typical meeting, I do not intend spending a lot of time talking. The business meeting is an important part because of the information we must present for your approval from other meetings. I did want to pass on that the newsletter has been pared down to keep costs as low as possible. It will still have all the information that can be packed into the remaining pages. Al Pierce and his wife have agreed to take over production of the newsletter. I believe that they can have it available for the March issue.

Tom Kasner is the Beagle Buddie for the club and has been updating the AppleWorks TimeOut series to the 3.0 version. He will be available to update your disks at most all the meetings, if he can't do the updates at the meeting he does ask you to make arrangements for pickup and delivery of the disks.

Bruderbund will be our guest at the February meeting, make sure you ask everyone you know to attend and make this a super turnout.

SECRETARY'S REPORT

The general membership meeting was held on January 27th, 1990 at the Marketplace-at-the-Grove. The meeting was called to order by President Leslie Bradford at 12:30 P.M. There were 47 members and 7 guests present.

Les reminded the members that the success of the club depends on the participation of the members. In order for the Board to support the needs of the members, they need to know what those needs are. The members of the Board who were present were introduced so the members would know who to contact for their input.

We do not yet have an editor for the Sandy Apple Press. Les will be unable to continue as editor. Glenn Russell is chairing a committee to publish the newsletter. Don Robinson and Al Pierce are coordinating their efforts in obtaining speakers for future programs. He asked the members to contact them for their suggestions for programs.

A lengthy discussion followed exploring the costs of publishing the SAP. Several members made suggestions for methods of reducing the costs. Glenn will meet with his committee to determine the most cost-effective method of publishing and mailing the newsletter.

The president then explained that due to the non-profit status of the corporation and the insurance limitations, we can only allow a guest to visit three meetings before joining. In addition, only members may purchase Disks-of-the-Month or participate in the raffle.

Those guests and new members identifying themselves were then introduced and asked what their specific needs were. Generally speaking, they were new owners and/or entrepreneurs who needed help with programs. Les referred them to Tom Kasner as our resident expert in business software.

The dues structure was discussed. The president announced that the Board had voted to allow those members paying in advance of their renewal date would be allowed a 10% discount on their dues.

Members Frans Guepin announced two free classes in AppleWorks and Computer Science being offered beginning February 5th.

Disk Librarian, Kathy Hobel, demonstrated the Disk-of-the-Month. She informed the members there would be two DOMs each month, one for the //gs, one for the //c & //e. It will be reviewed in the SAP and demonstrated at the general meeting.

A short question and answer period was conducted regarding "launching" programs. The meeting then adjourned at 3:00 P.M.

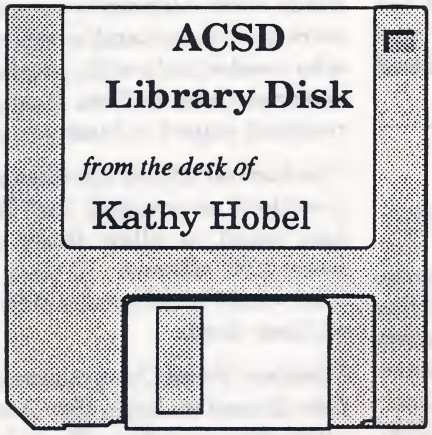
NOTE: The business session for the general meeting in the future will be from 12:30 to 1 P.M. The length of this meeting was due to reorganization under the newly elected Board of Directors.

The Board of Directors of the Apple Corps of San Diego met on February 6, 1990. Members present were: President Leslie Bradford, Secretary Vera Mizell, Treasurer Jim Holodnak, Disk Librarian Kathy Hobel, Past President Tom Kasner, Board Members-at-Large Hank Brooks, Al Pierce and George Pugh, and Assistant SAP Editor Glenn Russell.

The Board voted that as of February 1, 1990, that renewal of membership dues will be due as of the 1st of the month following the date the member joined. (i.e., if a member joined 1/27/90, renewal dues would be due as of 2/1/91.)

In addition, the Board voted that if a member renewed their dues at least 30 days prior to renewal date, a 10% dis-

(Cont on page 7 col 2)



Information on the DOM's for February 1990.

The GS DOM has the following programs, again you must boot from your system or startup disk:

Disk Witch version 1.3 - a CDA that performs file operations from the control panel in ProDOS 8,16 or GSOS. It still doesn't copy files yet, but if you're sick of it reading the disks every time you access it, now it does it only when you want to.

ImageWriter II CDA version 2.0 - a new, improved version which has a better looking display and a more intuitive user interface. Please read the included text file for a special offer for a customized version of this CDA.

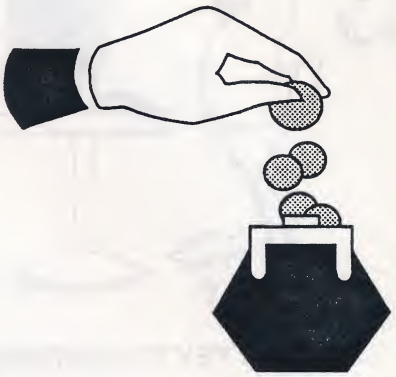
BufferInit version 1.14 - a 32 or 64k printer buffer that loads internally and works with the IIgs printer port and your internal ram. Really nice and appears to work flawlessly.

Apple.Rx version 2.6 - a virus detector/protector. This version is substantially faster than previous ones.

Poker Challenge GS - you're dealt cards at random and must try to construct meaningful power hands within the allotted time — harder than it sound! Great for trying to sharpen your poker skills.

Treasurer's Report

by Jim Holodnak



Monthly Treasurer Report

1/31/90 Cash on hand		$ 868.00
Expenses		
Dec/Jan Sap	$ 190.00	
Disks and Supplies	$ 220.00	
Meeting Hall	$ 50.00	
Estimated expenses		$ 460.00
2.28/90 Estimated Cash Balance		$ 408.00

Note: The new annual insurance premium for 2/1/90 to 2/1/91 came in @ $379.00

AW 3.0 Patcher version 1.1 - a collection of eight problem fixes to AppleWorks 3.0. A complete description of fixes is in the documentation file (included in the SHK file). Patches were written by Alan Bird, Randy Brandt, Rob Renstrom, and Mark Munz. This program is Freeware. You may give it away to anyone you like, just make sure the documentation file is kept with it.

SuperClock NDA - a very functional clock NDA for the IIgs that allows

a SMALL clock (less desktop space) to be placed in a window on the desktop OR right in the menu bar. It does NOT use any interrupts. Has options for date and time, time only, menu bar or window clock. It allows you to keep the clock on the desktop (or in the bar) when running an application since it takes up as little space as possible.

Slideshow IIgs - a slide show program for the GS that displays Screen image ($C1) and Apple Preferred format (APF/$C0/$0002) pictures in any directory. Includes documentation.

Lunar Lander GS - Land a lunar module on the moon! You must use your booster rocket to fine tune the landing so as not to go hurtling into the craters. Great SHR graphics and a fantastic song accompanying the fast paced action.

(Cont on next page)

(Cont from page 4)

List Maker GS - helps you make and maintain lists. Shopping lists, Christmas lists, lists of people to send cards to, lists of things to do, any kind of list. Lists can be saved and reloaded, and printed so you can take them with you.

UtilityWorks Launcher version 1.6 - a full featured program launcher which provides easy-to-set-up (just point and click your mouse) launch buttons displayed on a SHR screen New to this version 1.6 is the ability to set Desktop colors, purge memory on launch, and set Startup Slots for each program launch button. Also now provides hot keys for menu selection and improved menu Editing. Program is in ExpressLoad format and includes Quickdraw speed enhancements for improved performance with System Disk 5.0. The UtilityWorks Launcher is Shareware - $10 fee.

AWGS.3.5.Disk.Labels - a group of files which will enable you to print great looking labels for your 3.5 disks on your ImageWriter using AWGS. Included are all the template files, a sample label, a font, and a detailed documentation file.

Worm Runner II - this version corrects a clearscreen bug at the final level. (Not too many people have gotten that far!) Additionally, this version runs slightly faster for more challenge.

The 3 GS Special disks this month are SOUNDSMITH, a music Shareware program from Spain, and two music disks to use with the program. The Shareware fee again is $20.00 in "banknotes." (A $20.00 bill or equivalent.)

The club also has available from Roger Wagner a set of 10 disks that are a working DEMO of HyperStudio. You can view the stacks on the disks, you can create your own stack, but you can't save it! If you are thinking about getting HyperStudio at all, TRY THIS DEMO! The stacks alone are worth more than the $10.00 if had to download them from Genie or Online America! I did download them, then here is the demo in the mail from Roger Wagner! If you are interested in the HyperStudio Demo, call me (583-9318) and i will bring them to the meeting for you. I will NOT have them available without prior notice.

The E/C DOM for February 1990 has the following:

Apple RX version 2.4 of Apple.Rx, a SHAREWARE virus detector.

Copyright 1989 by Glen Bredon.

Columnist is a powerful and versatile text-based page layout utility. It can take any ASCII text or AppleWorks Word Processor file and format it in 2 or 3 columns. The column width and space between the columns can be controlled, the columns can be full or left justified, page headers and footers can be added, multiple files can be appended together, and MUCH more.

This version (2.05) has several bug fixes over v2.0. A shareware STEAL at $10.00!

DISK.TEST uses ProDOS 8 to do three basic speed tests on any disk device, including floppy disks. It reads block 0 a total of 1024 times. It does a sequential read from block 0 to block 1023 (or the max on the drive). And it does a seek test across 1/3 of the drive 100 times. The tests can be used to make ProDOS 8 comparisons between different drives, drive interleaves, and devices. This program is roughly similar to the Disktimer GS program for the Apple IIgs, except DISK.TEST is compatible with Apple II's from the nonplused up through the IIgs. It recognizes the IIgs clock, the No-Slot clock, and any clock driver that places 'seconds' in locations $20F and $210.

SMARTBOOT - [NOTE: The ONLY change to this version is elimination of ANY patches to block 0.] Version 1.3—Allows booting ProDOS 8 from any device on a Smartport chain (not just the first one). Also, it will allow booting to a hard disk, waiting for the disk to come up to speed before trying to boot it (and this works for either ProDOS 8 or GS/OS). Turn on computer and hard disk at the same time!! Runs on any 65c02 or 65816 based Apple II (IIc, IIc+, IIgs, or enhanced IIe).

Real System Utilities version 1.10B is an all menu-driven utility program that is meant to replace Apple's System Utilities. Shareware.

There also is a DHR graphic of the Zodiac and a guessing game (very simple!)

The 2 E/C special disks are a "Game" that shows a SUNCAR race across central Australia, it also allows you to design your own car to race.

PRICES of DOM's

The E/C DOM is $2.00, a special disk is $1.00 The GS DOM is $3.00, a special disk is $2.00 From time to time I will have Demo's available, the price for them is $1.00 a disk or $.50 if you buy a DOM or FREE if you buy a two DOM's or a DOM and a special.

Happy computing, Kathy Hobel

"...You can't find a better buy than our Disk of the Month. The very best games and utilities are downloaded from Online America for these disks..."

Computer Tips: How to Keep Your Equipment Running

Submitted by Glenn Russell

This is a compilation of things that you can do before resorting to calling for a serviceman to come out. In my travels around the San Diego School District, I have found that about 30% of the calls I have made could have been done easily by the teacher that had the problem.

Part 1: Disk Drives

Here is where I have found over 50% of our calls are related to; disk drives that won't boot or save data. Some of the time, it is a true mechanical or electronics problem that causes the malfunction. But most of the time, it is either a bad diskette or dirty read/write heads that are causing the headaches.

Ways you can keep your disk drives happy:

1. Cover the computers at night. Many teachers feel this is a waste of their time, but in schools that are very dusty (i.e., the "bungalow" style classrooms), this could be a real asset to the smooth operation of your computer. You wouldn't beleive the amount of dust that accumulates in computers, in as little as a month's time.

2. Try different diskettes in the suspected faulty drive. Sometimes the problem lies in the diskette, and not the drive. Diskettes spin at an average of 100-300 RPM's, depending on the drive. They will wear out over time, this is a fact of life.

3. Purchase a Wet-Head disk drive cleaning kit. Many of the "major" problems are due to the fact that diskettes do wear out, and leave a metal-oxide deposit on the heads. A Wet-Head type disk drive cleaning kit, used when the drive displays such tendancies as not booting, or not saving data correctly, can correct the problem immediately, without having to wait for the serviceperson to come out.

(A Wet-Head cleaning kit is basically a special diskette which is soaked in alcohol and inserted into the disk drive, then allowed to spin for about 30 seconds. This usually removes most of the contminants from the surface of the read/write head.)

This applies to ANY of the following types of disk drives: Apple Disk II, UniDisk, DuoDisk, and Rodeo drives (all of which make up the majority of disk drives in the San Diego School District).

Part 2: 3.5 inch Disk Drives

Unfortunately, due to their design, there isn't much that can be done with these drives by you. When something does go wrong with these drives, it's best to call your serviceperson.

Part 3: Monitors

Over time, monitors will fail, just like your home television set will. But, there are things that can be done to extend the life of the monitor.

1. Cover the computer. (I bet you've seen this one before). Dust gets into EVERY part of a computer system. Those ventilation slots are great for letting excess heat out, but, alas, also allow dust to enter. Covering the computers at night will reduce the amount of dust that can settle inside the monitor.

2. If you find that your monitor is not operating properly, there are a few things you can check. Children are naturally inquisitive. They like to turn KNOBS. Before giving up in disgust at a monitor that doesn't work, check a few of the knobs, like the BRIGHTNESS knob (usually located in the back of Monitor II's, or in the front of ColorMonitor IIe's and Amdek's, or on the side of AppleColor RGB monitors). Many is the time when a teacher has been truly embarrased to learn that the heart of their problem is the fact that some student turned the brightness control all the way down (and/or the CONTRAST control (located on the right side of Monitor II's).

3. Another item to check on is the cable that runs from the computer to the monitor itself. Known as the VIDEO CABLE, it sends the signal from the computer to the monitor. If the signal cannot get through, there will be no picture. Makes sense, doesn't it? If you find that a computer has no picture on it's monitor, here are things to try:

a. Make sure the cable is securely plugged in. I have found, especially in classrooms with small children (K-3), that the cable often gets yanked on, and pulled out of it's socket(s).

b. If that doesn't solve the problem, jiggle the cable. If you see a picture blinking on and off, then you know the problem lies in the cable.

(Call your serviceperson, we'll replace it).

c. If it still isn't working, try to swap the cable from a computer which is working to the one that isn't. A very bad cable will not work no matter how much you jiggle it. If that solves the problem, then call your service person to obtain a replacement cable.

Part 4: Printers

Here is a heavily complex subject, which causes everyone headaches. Since there is so much that can go wrong with printers, it's hard to lay down some simple cures for fixing printer problems, but here goes:

1. Cover the printer (this is getting monotonus, isn't it?) That good old enemy of computers, dust, will cause problems in printers just as easily as it does in computers, disk drives and monitors. And even moreso, since there are many more moving parts in a printer to get clogged up with dust.

2. If you find that you are having problems with the print quality of your ImageWriter (or any printer), check the ribbon. Ribbons wear out, and the casing which holds the ribbon tends to not move as easily in some ribbons than as in others. If a ribbon is very

tight and hard to turn by hand, imagine how tough it is for the printer. Try another ribbon. If that solves the problem, throw the old ribbon out, even if it is almost brand new. Better to replace a $5.00 ribbon that a $200.00 printer.

3. Keep the insides of the printer clean. Paper lint and the little round circles from form feed paper tend to collect inside the printer. I know of no vacuum cleaner small enough that is powerful enough to suck out dirt and lint. I use a small long handle brush (like an artist brush) with stiff bristles to brush the dirt and lint off the parts, then blow out the residue with compressed air or lungs.

4. If you find that your Imagewriter won't print from your computer, perform a self test. Make sure there is paper in the printer, then turn it off. Now, hold down the Form Feed button and turn the printer on, then release both buttons. This sends it happily along printing out row after row of the alphabet and other characters found on most keyboards. If the printer does nothing, then you know there is a serious problem, and should call a serviceperson.

(Note: The above procedure also works with most Epson printers.)

5. Another thing to check are those infamous cables again, especially the one that leads from the computer to the printer. Try swapping the cable from a known good system to this one (make sure the power is OFF to both the computer and the printer). If that solves the problem, call your serviceperson to get a replacement cable.

This list will be added to as more common problems (and easy fixes) are found. Remember, common sense plays a big part in keeping your computer equipment running. Make sure the darn thing is plugged in! Fixes and tests you can run on the computer yourself will be included in an update to this tips sheet.

Kasner Electronics
COMPUTER PRODUCTS CONSULTANT
ELECTRONIC DESIGN & REPAIR

TOM KASNER

10185 AUTUMNVIEW LN
SAN DIEGO 92126
(619) 693-0331

(Secretary's report for page 3)

count would apply. (i.e., if dues are due 2/1/91, renewal must be paid prior to 1/1/91 for the 10% discount to apply.)

The Board voted to establish prices for DOMs as follows:

3.5"	Regular	$3.00
3.5"	Special (if available)	2.00
3.5"	Demo (if available)	1.00
5.25"	Regular	$3.00
5.25"	Special (if available)	2.00
5.25"	Demo (if available)	1.00

If a member purchases two or more DOMs, the Demo would be free (if available)

Members may purchase DOMs for their guests at the meeting in order to comply with our insurance limitations.

The Board authorized an expenditure of $150 for the Disk Librarian to purchase disks and ribbons for resale to members only and to produce DOMs.

As our Beagle Buddy, Tom Kasner will be upgrading the TimeOut series for registered owners. He reminded us to inform members and guests that we do not copy commercial programs at our meetings. This is a violation of Apple Users Groups associated with Apple Connection.

Thomasin Pierce has agreed to become the SAP Editor as of the March issue. The Board extends a vote of thanks for her offer. It is a much needed position to be filled. In addition, Glenn Russell will continue as Assistant Editor, Al Pierce, Donna Chateau and Rudy Pascua have offered to help with the compiling of information. Dick Carlson will continue to produce the labels and Vera Mizell will continue to do the bulk mailing. It is truly a joint effort of the members to continue publication of the SAP.

The Board voted to have Board Member, Hank Brooks, will replace Dick Carlson as Membership Chairman with Dick as his assistant. Hank will man the desk for new members and guests and Dick will assist the members in signing in at the meetings. Members are encouraged to contact Hank to volunteer as greeters for guests and new members at the meetings.

MEMBERSHIP INFORMATION

Individual dues are $20.00 An application may be found on the back cover of this issue. Handicap rates, half price.

MEMBERSHIP RENEWAL

Renewals should be paid the month before expiration to prevent missing an issue of the newsletter and to maintain active membership. Your dues should be mailed to the club post office box or paid in person at the general meeting, using the membership application.

LIBRARY DISK

The monthly 5-1/4" disk $2.00(Member) if purchased at the meeting, add $1.00 for mail. There are currently seventy library disks with programs on both sides. We now have 3-1/2" disks at $3.00 (Members), at the meetings add $1.00 for mail. Disks for the Apple IIGS are available. See Kathy Hobel, Disk Librarian.

Help Line

The following persons have volunteered to give help in the various areas of computing. This list is far from complete, and I am hoping to hear from more of you who would also like to assist in this way. Do not think that you have to be an expert to be on this list. We want people who are willing to help. Remember that by helping, you will learn, too. Call the editor to have your name placed here.

TOM KASNER---SYSTEM AND APPLEWORKS----693-0331

RICHARD TROVATO--ProSel & Beagle (TimeOut) ----426-6150

------MACROS-------CROSSWORD PUZZLES-----CREATIVE WRITING---etc.

CONSIGNMENT TABLE

At each meeting there will be a table set up for Consignment merchandise. This is a service for members only provided by the ACSD and manned by Bert Wills. If you have any "new" or "experienced" Apple Computer products and software that you would like to sell this is the place to take them.

PLEASE DO NOT USE THE TABLE TO RECYCLE YOUR JUNK PARTS OR EQUIPMENT

Set a price for your sale items including a 10% fee which will be donated to the Apple Corps for selling your items.

Here is the information you will need to give to Bert:

1. Name
2. Phone Number
3. Address
4. Asking amount for item

Bert will sell and collect the monies from the buyer. He will pay the consignee the total amount asked. The consignee in turn will pay the 10% fee to Bert for the service.

Items that have not been sold at the end of the meeting should be picked up by the consignee, and of course, you could bring them to the next meeting and try to sell them again if you like.

All items left on the table and not picked up at the end of the meeting will become the property of the Apple Corps of San Diego.

IIGS USERS

By now it seems that there are a lot of IIGS users and that a lot of the questions and answers are specific to those users.....We are looking for someone who has a IIGS who would be willing to bring it to a meeting. There is a sign up sheet at the reception desk. I am available to help anyone who has questions about the IIGS and some of the accessories.
